### WATER COOLERS

Halsey Taylor has made a commitment to the future with the following outstanding features:

- Designed for dependable long life
- Heavy gauge steel with stainless steel tops
- Exclusive double bubbler projector on most models
- Easy-to-clean, anti-splash rim receptor
- High efficiency compressor
- Copper/aluminum tube-and-fin condenser that transfers heat more efficiently
- Lead-free construction as defined by Safe Water Act
- Five-year limited warranty on sealed refrigeration system, and one-year limited warranty on all other parts and labor
- Designer finishes available on all but economy floor models
- Rated GPH is based on water cooled to 50°F @ ambient air temperature of 90°F

#### Installation Requirements:

- 4" installation cord supplied with unit
- Power requirements: 120VAC, 15A, 60 Hz
- Water connections: 1-1/8" IPS for waste water and 3/8" O.D. supply line

#### Barrier-Free Handicapped Accessible Cooler – 390-340

- For initial installation or replacement of almost any make or style
- They include all features listed above, plus they meet all Federal accessibility standards of Americans with Disabilities Act (ADA) and ANSI, and have chrome plated push bars on front and side, with raised lettering for visually handicapped.
- BI-level uses single drain and supply

#### Waycor™ Barrier-Free Handicapped Accessible Coolers – 390-420 and 390-430

- For initial installation or replacement of almost any make or style
- Crafted from durable polymer material to resist damage
- No sharp corners or flanges
- Easy-touch push bars require minimal pressure to activate
- Meets all federal accessibility standards of Americans with Disabilities act (ADA)
- 390-430 is a twin unit, including one wheelchair accessible cooler; uses single drain and supply
- Replaces HAC models
